

How to install JSTiming results app

- **On Android**

- Visit www.jstiming.nl
- Add App to Home Screen automatic pop-up
- Click on pop-up
- If you didn't install the app after seeing it for the first time, to see the pop-up again you will probably need to clear out your browser cache

- **On iPhone**

- Visit www.jstiming.nl
- Click at the bottom of the page on >
- Click on put on home screen
- Click Done

- Depending on the type of telephone and the settings, the results files are not refreshed on some telephones.
The simplest solution is to clear out your browser cache and to set your internet browser to navigate incognito.
